DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on October 7, 2003 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent 6,489,622 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: As the claimed invention was read in light of the specification, the prior art of record fails to disclose or render obvious a method for performing an ion implantation comprising a target chamber for containing a target for implantation and an ion source chamber including an ion source for generating an ion beam and disposing at a beam entrance in said target chamber a beam deceleration optics that includes means for generating an off-axis electric field for decelerating and deflecting charged particles in a vertically spread beam of said ion beam to project toward said target along a deflected angle away from the neutralized particles in said ion beam.

The closest prior art, Adibi et al. (5,883,391) and Dawson (6,111,260), teach a method for performing an ion implantation comprising a target chamber for containing a target for implantation and an ion source chamber including an ion source for generating an ion beam and decelerating the beam. However, they are silent as to the exact placement of the deceleration optics as well as defecting in a vertically spread beam.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
